Start your search using either the **simple search box** at the top of the page or use the **multiple search boxes** on the left side to construct a more targeted search.

**Search - using one or multiple search boxes**
- Enter term(s) in the search box(es) -- Use quotations (" " ) to search for a phrase
- Select either **Content, Title, Author, or Publisher**
- Select **And, None, Or**

The example retrieves all Content with (the terms) water rights AND all Content with the term conservation. This is a broad search from which further filtering can yield more targeted results.

**Search data types:**
- **Content** - searches in all titles, citations, journal articles, book chapters, abstracts/summaries
- **Title** - searches in the title of a journal article or the title of a book
- **Author** - searches for content by a particular author

**Ways to link your search terms:**
- **And** - automatically combines terms (automatic AND) to search within Content, Title, Author, or Publisher
- **None** - excludes content with any term(s) typed in the search box using None
- **Or** - automatically inserts OR between the search terms
- **Publisher** - searches for all books and journals by a particular publisher
Use Facets to Filter Search Results

- Use the facets on the left side of the search page to refine your results.
- Search defaults to ‘Only content I have access to’, which is the MUSE content subscribed to or purchased by your institution. To see all content on MUSE, subscribed and not subscribed, select All content.

**FACETS TO FILTER YOUR SEARCH RESULTS:**

**Content Type**
The number of journal articles (articles and reviews) and books with content relevant to your search term. Content based on what an institution has access to. Check boxes to include/exclude Reviews.

**Publisher**
Select a publisher to view only content by that publisher within your search results.

**Series**
To view search results contained in a book series, select the name of the series.

**Journal**
To view or limit search results contained in a specific journal, select a journal.

**Author**
Select an author to view only content by that author within your search results.

**Language**
Select a language to view only content in that language within your search results.

**Research Area**
Project MUSE organizes content into subject groupings called Research Areas. Select a Research Area to see results in that subject.

**Year**
Click on the down arrow to select a date range to limit to content published during that period.
